Anyan's comments:

Today's AHS is not a 4-cut comic lol. I made an unusual one with the motif "what if military aircraft went on facebook". All the things I couldn't really put in a 4-koma format and new ideas were applied... it was very fun! It took a while than expected though; putting all the text in the facebook format was pretty hard, comics are easier ;_;

Su-47's boyfriend...was MAVE from the anime Yukikaze! lol delusions

Frogfoot's cheerleader outfits were based on the livery of the now disbanded airshow team Небесные Гусары (celestial hussars, or sky hussars). The team's dedicated airframe was of course the Su-25.

MiG-29's crazy outfit is based on North Korean liveries -_-;
